

TREASURE UNDER PRESSURE

- Co-operative
- 4 distinct roles
- 30 second rounds
- Continuous play

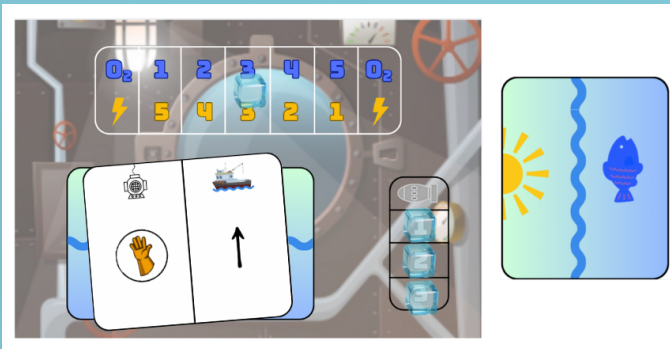

Treasure Under Pressure is a co-operative against-the-clock exploration game. 1 to 4 players control distinct members of a diving ship's crew, each with different tasks to perform each round, to find and recover treasure on the sea floor - against a constantly moving 30-second sand timer!

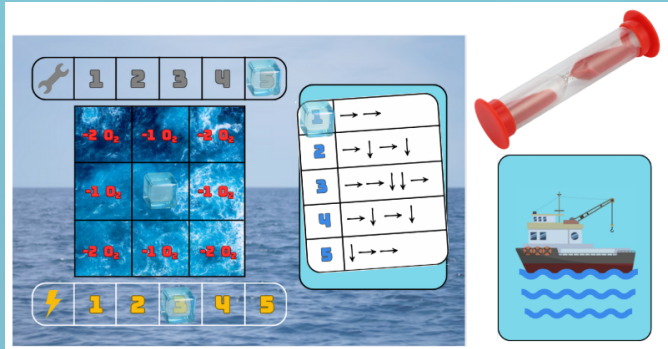

The diver manages stamina and oxygen, rolls action dice and draws encounter cards

The bellman uses the diver's dice actions to explore the seabed and move the diver pawn, to cross encounters and find the treasure

The engineer manages the ship's power, draws cards which affect the other crew and uses depth charges

The captain manages the sand timer, the ship's damage, and the ship's position on the surface, keeping it above the diver

1-4
